JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

**V. Part of a Letter to Dr. Clopton Havers ,  
S. R. S. giving an Account of an extraordinary Hæmorrhagia at the Glandula Lachrymalis.**

*S I R,*

**S**ince my coming to this place I have met with a very strange Case. An Ictericall discontented Woman having a desire to dye, wholly rejected the help of Medicine, and within three Months being well nigh her end, there happened an Eruption of Blood out of the *Glandula Lachrymalis* of one of her Eyes, without any External Injury : There was an Evacuation of ℥ij. of Blood within the space of Thirty Hours. About a Week after the same Sluce was opened again, and she bled till she dyed. Now, I would fain know what Blood-Vessels come to that Gland, from which such a vast quantity of Blood should be cast forth in so short a time.

**VI. A Letter from Richard Townley, of Townley in Lancashire, Esq; containing Observations on the Quantity of Rain falling Monthly, for several Years successively: Communicated to the Royal Society.**

Townley, Jan. 9. 1693.

*S I R,*

**I** Have now compleated this last Year's Observations, which I was very desirous should accompany the others I now also send you; and I hope you will be pleased
